Russian Academy of Sciences. Sbornik. Mathematics

CONTENTS

Volume 77, Number 1 **January 1994**

I. Khèmblton [I. Hambleton] and A. F. Kharshiladze, A spectral sequence in surgery 1

V. A. Dem′yanenko, Elliptic functions and Fermat's equation 11

V. V. Fedorchuk and V. V. Filippov, Manifolds with noncoinciding inductive dimensions 25

I. A. Aliev and A. D. Gadzhiev, Weighted estimates of multidimensional singular integrals generated by the generalized shift operator 37

A. Sakabekov, Initial-boundary value problems for the Boltzmann system of moment equations in an arbitrary approximation 57

N. M. Kasumov, Calderón-Zygmund theory for kernels with nondiscrete sets of singularities 77

G. M. Gubreev, On a class of unconditional bases in Hilbert spaces and on the problem of similarity of dissipative Volterra operators 93

V. I. Semenov, An extension principle for quasiconformal deformations of the plane 127

N. N. Kholshchevnikova, The generalized Bari theorem for the Walsh system 139

S. A. Nazarov and B. A. Plamenevskiĭ, Elliptic problems with radiation conditions on edges of the boundary 149

M. P. Vishnevskiĭ, On the stabilization of solutions of weakly coupled cooperative parabolic systems 177

A. I. Bulgakov, Integral inclusions with nonconvex images, and their applications to boundary value problems for differential inclusions .. 193

M. I. Zelikin, On the theory of the matrix Riccati equation. II 213

G. E. Tkebuchava, On unconditional convergence with respect to systems of products of bases 231

F. Kh. Mukminov, On decay of a solution of the first mixed problem for the linearized system of Navier-Stokes equations in a domain with noncompact boundary 245

Volume 77, Number 2 **March 1994**

S. I. Pokhozhaev, On entire radial solutions of some quasilinear elliptic equations 265

Yu. È. Linke, Supplements to Michael's theorem on continuous selections, and their applications 279

B. N. Khabibullin, On the type of entire and meromorphic functions ... 293

S. V. Khabirov, Infinite-parameter families of solutions of nonlinear differential equations 303
A. S. Belov, On upper estimates of the partial sums of a trigonometric series in terms of lower estimates 313
A. Yu. Khrennikov, On the theory of infinite-dimensional superspace: reflexive Banach supermodules 331
Fam Khy·u T′ep [Phạm Hữ'u Tiệp], Basic spin representations of alternating groups, Gow lattices, and Barnes-Wall lattices 351
Zh. Bustamante [J. Bustamante] and G. Lopes Lagomasino [G. Lopez Lagomasino], Hermite-Padé approximation for Nikishin systems of analytic functions 367
V. V. Napalkov and R. S. Yulmukhametov, Weighted Fourier-Laplace transforms of analytic functionals on the disk 385
A. O. Ivanov, I. V. Ptitsyna, and A. A. Tuzhilin, Classification of closed minimal networks on flat two-dimensional tori 391
V. M. Miklyukov, Maximal tubes and bands in Minkowski space 427
M. D. Kovalev, The problem of cutting subspaces 455
E. G. Sklyarenko, On Zeeman's filtration in homology 477
P. A. Zalesskiĭ, The structure of the congruence kernel for SL_2 in the case of a global field of positive characteristic 489
N. N. Savel′ev, Adding relations to instanton homology groups of Seifert fibered homology spheres 497
L. M. Lerman and Ya. L. Umanskiĭ, Classification of four-dimensional integrable Hamiltonian systems and Poisson actions of $\mathbb{R}^2$ in extended neighborhoods of simple singular points. I 511
